Dmitry (Middle fullstack developer)

About me

I’m a frontend developer who has a results-focused attitude to creating SPA, using React/Next, Vue/Nuxt, Redux/Vuex/Pinia, JS/TS.
My early work can be viewed in GitHub repository (github.com/VladimirGromyko).
I'll consider the position of frontend developer which will require me to utilize my skills, abilities in the IT field to ensure the company's success.
My free time I prefer to spend with reading.
I have a strong character in achieving the goal. This helped me to be an excellent student in my youth, and then to grow in my career at work. In addition, I know how and I know what it means to take responsibility for any decisions. I think all these qualities will allow me to improve and progress as a developer of high-quality products.
